DETAILED ACTION

1. Acknowledgement is made of Amendment filed August 16, 2007.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: The abstract is revised to read as follows:

As a p-type ohmic contact electrode formation technique in a Group II-VI compound semiconductor, there is provided a material for forming an electrode that is low in resistance, stable, and not toxic, and is excellent in productivity, thereby providing an excellent semiconductor element. A semiconductor electrode material in the form of a material represented by a composition formula $A_xB_yC_z$ where A: at least one element selected from Group IB metal elements, B: at least one element selected from Group 8 metal elements, and C: at least one element selected from S and Se), and where X, Y, and Z are such that $X+Y+Z=1$, $0.20 \sim X \sim 0.35$, $0.17 \sim Y \sim 0.30$, and $0.45 \sim Z \sim 0.55$.

Allowable Subject Matter

3. Claim 1 has been cancelled and claims 2-12 are allowed.
4. The following is an examiner's statement of reasons for allowance: the prior art of record, taken alone or in combination, fails to disclose or render obvious forming a p-type electrode from a chalcopyrite compound containing Cu, Fe and S or Se in contact with a Group II-VI compound semiconductor nor the use of a stepwise decrease in components of the electrode of this compound used with a light-emitting element as shown in claims 2 – 6, 9 and 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
